INTERIM TITLE INDEX

Vol. 60 (1969)

Acetamide, N,N′-2,7-fluorenylenebis- or N-nitrosodiethylamine. Effect of 7,12-dimethylbenz[*a*]anthracene or 4-nitroquinoline 1-oxide placed on glandular stomach combined with oral administration of 211

Adenovirus type 12, tumor induction by, and its target cells in the central nervous system 383

———— tumor cell lines, hamster. Giant pleomorphic nuclei in, after treatment with HVJ 461

Aldolase, molecular species of, in the liver of tumor-bearing rats.....433

———— isozyme patterns in the liver of patients with malignant tumor in the stomach or esophagus.....449

Amine, N-butyl-N-(4-hydroxybutyl)-nitroso-, in rats. Histogenesis of urinary bladder tumors induced by.....401

———, **N-nitrosodibutyl-,** carcinogenic action of, in mice.....353

———, **N-nitrosodiethyl-,** or N, N′-(2,7-fluorenylene)bisacetamide. Effect of 7,12-dimethylbenz[*a*]anthracene or 4-nitroquinoline 1-oxide placed on glandular stomach combined with oral administration of 211

———, ————————, in rats. Specific gravity of liver cells during hepatocarcinogenesis by 499

———, **N-nitrosodimethyl-.** Effect of unilateral nephrectomy on the development of kidney tumor in rats treated with 319

Amino acids, aromatic, and proteins. Interaction of the carcinogenic 4-nitroquinoline 1-oxide with 307

——— ———, aromatic, and carcinogenic aromatic compounds, resonance transfer of excitation energy between, as a possible mechanism in carcinogenesis 469

Aminonaphthalenes, N-hydroxy-, and carcinogenic aminonaphthols. ESR study on the free radicals produced from 509

Aminonaphthols, carcinogenic, and N-hydroxy-aminonaphthalenes. ESR study on the free radicals produced from 509

Anticancer drugs, effect of, on DNA synthesis and mitosis in regenerating rat liver 13

Antitumor agent, influence of, on isozyme pattern of β-glucuronidase.....129

———— action, host-mediated, of schizophyllan, a glucan produced by *Schizophyllum commune* 137

———— activity and chemical structure, relation between, in some derivatives of 2-amino-6-purinethiol.....187

———— activity and chemical constituents of yeast polysaccharide.....287

Ascites carcinoma cells, Ehrlich, promotion of resistance to, by injection of tumor cells mixed with yeast cell wall...655

——— **tumor,** mouse, in rats. Heterotransplantation of 329

——— ———. Induction of non-transplantable mutant clones from.....367

——— ——— **cells,** Ehrlich. Carbon dioxide evolution from glucose[1-^{14}C] by a microsome-free supernatant of.....49

——— ——— ———, Ehrlich, induction of phagocytosis of iron colloid by, with polycationic substances 439

——— ——— ———. Glucose-induced pH changes in 657

Azobenzene, 4-(dimethylamino)-. Modes of action of three bacteriostatic agents in their inhibitory effect on induction of hepatoma in rats fed.....167

Bacteriostatic agents, modes of action of, in their inhibitory effect on induction of hepatoma in rats fed 4-(dimethylamino)azobenzene 167

Benz[*a*]anthracene, 7,12-dimethyl-, or 4-nitroquinoline 1-oxide, effect of, placed on glandular stomach combined

with oral administration of N, N′-(2,7-fluorenylene)-bisacetamide or N-nitrosodiethylamine 211
———————, ———————, leiomyosarcomas induced by, in gastric cysts grafted in subcutaneous tissue of mice 333
———————, ———————. Cytogenetic analysis of cell populations in rat leukemia induced by pulse doses of 529
Bleomycin, nuclear changes produced by, in the 3-methylcholanthrene-induced mouse epidermal carcinoma cells ...503
Breast cancer. A simplified method for determination of hormones responsible for 23
——— **carcinoma** in Japanese women living in Hawaii 181
Burkitt tumor, a childhood lymphoma of jaw resembling; the first case in Japan 347
Carbon dioxide evolution from glucose-[1-^{14}C] by a microsome-free supernatant of Ehrlich ascites tumor cells.....49
Carcinogenesis, *in vitro*, with 4-nitroquinoline 1-oxide. Early events in.....261
———————, effect of salivary gland extirpation on, of rat stomach by 4-nitroquinoline 1-oxide 223
———————. Resonance transfer of excitation energy between aromatic amino acids and carcinogenic aromatic compounds as a possible mechanism in...469
———————, *in vitro*, preliminary studies on, of rat thymus cells by N-methyl-N′-nitro-N-nitrosoguanidine ...661
Carcinogens, potential weak and procarcinogens. Detection of.....523
Carcinogenic activity of 4-nitroquinoline 1-oxide derivatives and their ability to induce unequal nuclear division in the synchronized division of *Tetrahymena*.....155
——— action of N-nitrosodibutylamine in mice 353
Carcinostatic agents, effect of, on carcinomatous metastasis in the spleen 611
Catalase-depressing substance, liver, *in vivo*. Immunological studies on 199
Cell line, cultured suspended, a long-term, established from lymph node with metastasis from gastric cancer.....205
—— **population,** cytogenetic analysis of, in rat leukemia induced by pulse doses of 7,12-dimethylbenz[*a*]anthracene 529
Charge transfer in the molecular interaction of 4-nitroquinoline 1-oxide and related carcinogens with DNA and deoxyribonucleosides 97
——— ——— interaction, further observations on, of the carcinogen, 4-nitroquinoline 1-oxide, with DNA and deoxyribonucleosides 295
Cheek pouch, hamster, and human oral mucosa. Cytology and enzyme histochemistry of squamous carcinoma of 631
Chemotherapy, cancer. Multiple combination therapy in Japan.....239
———————, a screening model for, of lymph node metastasis.....351
Cholanthrene, 3-methyl-, induced mouse epidermal carcinoma cell. Nuclear changes produced by Bleomycin in 503
Chromosome aberrations, carcinogen-induced, in hematopoietic cells of mice 91
Chromosome markers and herpes-type virus particles in two human cell lines derived from embryonic cultures exposed to human leukemic culture fluid *in vitro* 247
Clonal analysis of Friend viral leukemia cells *in vitro* 107
Deoxyribonucleic acid. Reaction mechanism of 4-hydroxyaminoquinoline 1-oxide and related compounds in inactivation of the transforming activity of.....537
Deoxyribonucleosides and DNA. Charge transfer in the molecular interaction of 4-nitroquinoline 1-oxide and related carcinogens with.....97
——————— and DNA. Further observations on the charge transfer interaction of 4-nitroquinoline 1-oxide with 295

———————. A nuclear magnetic resonance study of the interaction of 4–nitroquinoline 1–oxide with.....557

DNA synthesis and mitosis in regenerating rat liver. Effect of anticancer drugs on 13

—— and deoxyribonucleosides. Charge transfer in the molecular interaction of 4–nitroquinoline 1–oxide and related carcinogens with 97

—— and deoxyribonucleosides. Further observations on the charge transfer interaction of 4–nitroquinoline 1–oxide with 295

Embryonic cultures exposed to human leukemic culture fluid *in vitro*. Herpes-type virus particles and chromosome markers in two human cell lines derived from 247

Excitation energy, resonance transfer of, between aromatic amino acids and carcinogenic aromatic compounds as a possible mechanism in carcinogenesis 469

Free radicals produced from carcinogenic aminonaphthols and N–hydroxyaminonaphthalenes. ESR study on.....309

Friend leukemia cells, viral, *in vitro*. Clonal analysis of 107

***Fusarium nivale*.** Radiomimetic biological properties of the new scirpene metabolites of 599

β–Galactosidase, β–N–acetylglucosaminidase, and α–mannosidase activities in human female genital cancer.....373

Gastric adenocarcinoma, induction of, in mice by localized X–irradiation.....253

Genital cancer, human female. β–N–Acetylglucosaminidase, β–galactosidase, and α–mannosidase activities in 373

Glandular stomach, carcinoma, of mice induced by 4–hydroxyaminoquinoline 1–oxide hydrochloride 151

———— ———— carcinoma, experimental, in rats.....211

————, ————, carcinomas, and other organs of rats by 4–hydroxyaminoquinoline 1–oxide hydrochloride 627

Glucosaminidase, β–N–acetyl–, β–galactosidase, and α–mannosidase activities in human female genital cancer.. 373

Glycogen and oligosaccharide contents, increase of, in ascites tumor cells under the influence of alkylating agents.....465

Growth-inhibitory activity of mannan fractions isolated from several species of yeast against sarcoma–180 solid tumor 65

———————— activity of purified mannan and glucan fractions from baker's yeast against sarcoma–180 solid tumor 273

Guanidine, N–methyl–N′–nitro–N–nitroso–. Preliminary studies on the *in vitro* carcinogenesis of rat thymus cells by 661

Hepatoma, spontaneous, transplantation of, in C3H mice; biological and biochemical studies 145

———— induction, modes of action of three bacteriostatic agents in their inhibitory effect on, in rats fed 4–(dimethylamino)azobenzene 167

Herpes-type EB virus and immunoglobulins, immunofluorescence study on production of, in the cell lines derived from human neoplastic lymph nodes...427

Heterotransplantation of a mouse ascites tumor in rats.....329

Hormones responsible for breast cancer. A simplified method for determination of 23

————, insect-moulting, ecdysterone and inokosterone, effect of, on tumor cells 341

Human cancer cell, *in vitro* culture of, for cancer chemotherapy.....205, 231

———— ———— —— **line,** newly established. Transplantation of.....649

HVJ. Giant pleomorphic nuclei in the hamster-adenovirus tumor cell lines after treatment with.....461

Hydrocarbon-induced leukemia in adolescent and adult mice.....545

Hydrogen peroxide, production of, by 4–hydroxyaminoquinoline 1–oxide 83

Immunofluorescence study on production of immunoglobulins and herpes-

type EB virus in the cell lines derived from human neoplastic lymph nodes...427
Immunoglobulins and herpes-type EB virus, immunofluorescence study on production of, in the cell lines derived from human neoplastic lymph nodes...427
Immunological studies on *in vivo* liver catalase-depressing substance 199
Inactivation, reaction mechanism of 4–hydroxyaminoquinoline 1–oxide and related compounds in, of the transforming activity of deoxyribonucleic acid 537
Incorporation failure of ^{3}H–pseudouridine into RNA by regenerating liver...605
X–Irradiation, localized. Induction of gastric adenocarcinoma in mice by.....235
————, leukemogenic, in mice. Earlier recovery of lymphopoiesis and immunological response by bone-marrow shielding after 393
Isozyme pattern of β–glucuronidase. Influence of antitumor agent on.....129
——— patterns, aldolase, in the liver of patients with malignant tumor in the stomach or esophagus.....449
Kidney cell line, established from African green monkey, malignant transformation of, by the Schmidt-Ruppin strain of Rous sarcoma virus...591
—— tumor in rats treated with N–nitrosodimethylamine. Effect of unilateral nephrectomy on the development of 319
Leiomyosarcomas induced by 7,12–dimethylbenz[*a*]anthracene in gastric cysts grafted in subcutaneous tissue of mice 333
Leukemia in Japan. Relative frequency and mortality rate of various types of 71, 343
————, development of, in rats by oral administration of N–nitrosobutylurea in drinking water 237
————, mouse, systemic effect of, on RNase and its inhibitor of host liver and spleen 279
———— cell, murine. Antigenic relationship between SL–leukemia cells and 355
————, rat, induced by pulse doses of 7,12–dimethylbenz[*a*]anthracene. Cytogenetic analysis of cell populations in 529
————, hydrocarbon-induced, in adolescent and adult mice.....545
———— mortality, childhood, in Japan 1947～1966, with special reference to the group of under 5 years of age.....569
Leukemogenesis, interference of, by mammary tumorigenesis in a colony of AKR mice 227
Life cycle, cell, and macromolecular synthesis. Effect on carcinogenesis.....261
Liver, regenerating. Incorporation failure of ^{3}H–pseudouridine into RNA by.....605
—— **cells,** specific gravity of, during hepatocarcinogenesis by N–nitrosodiethylamine in rats 499
—— **tumor,** induction of, in mice injected at birth with liver tumor extract 119
Lung cancer, induction of, in mice by a new carcinogen, 2–nitroquinoline.....609
Lymph node metastasis. A screening model for the chemotherapy of.....351
——— ——, human neoplastic, establishment of suspended-cell cultures from, and some morphological characteristics of each cell line.....419
Lymphoma of jaw, childhood, resembling Burkitt tumor; the first case in Japan 347
Lymphopoiesis, earlier recovery of, and immunological response by bone-marrow shielding after leukemogenic irradiation in mice.....393
Lysosomes of tumor cells, influence of plasmin on, and on the cytocidal effect of Mitomycin–C.....33
Macromolecular synthesis and cell life cycle. Effect on carcinogenesis.....261
α–Mannosidase, β–N–acetylglucosaminidase, and β–galactosidase activities in human female genital cancer.....373
Metabolism of tritiated carcinogenic 4–nitroquinoline 1–oxide and distribution of its metabolites in mouse 617
Metastasis, lymph node. A screening model for the chemotherapy of.....351

————, carcinomatous, in the spleen. Effect of carcinostatic agents on.....611
Mitomycin–C. Influence of plasmin on the cytocidal effect of, and on the lysosomes of tumor cells.....33
Mitosis and DNA synthesis in regenerating rat liver. Effect of anticancer drugs on 13
Mortality rate and relative frequency of various types of leukemia in Japan 71, 343
————, childhood leukemia, in Japan, 1947～1966, with special reference to the group of under 5 years of age.....569
Mutant clones, non-transplantable, induction of, from an ascites tumor.....367
Nasopharyngeal carcinoma. High anti-EB virus titer in sera of patients with 335
Nephrectomy, unilateral, effect of, on the development of kidney tumor in rats treated with N–nitrosodimethylamine 319
Nuclear magnetic resonance study of the interaction of 4–nitroquinoline 1–oxide with deoxyribonucleosides.....557
Oligosaccharide and glycogen contents, increase of, in ascites tumor cells under the influence of alkylating agents.....465
Oral mucosa, human, and hamster cheek pouch. Cytology and enzyme histochemistry of squamous carcinoma of 631
Phagocytosis, induction of, of iron colloid by Ehrlich ascites tumor cells with polycationic substances.....439
Plasmin, influence of, on the lysosomes of tumor cells and on the cytocidal effect of Mitomycin–C.....33
Polysaccharide, yeast. Chemical constituents and antitumor activity of.....287
Proteins and aromatic amino acids. Interaction of the carcinogenic 4–nitroquinoline 1–oxide with 307
^{3}H–**Pseudouridine,** incorporation failure of, into RNA by regenerating liver.....605
Purine analogs. Sensitivity of Nakahara-Fukuoka sarcoma to antitumor agents, especially to 115
Purinethiol, 2–amino–6–. Relation between antitumor activity and chemical structure in some derivatives of.....187
Quinoline, 2–nitro–, a new carcinogen, induction of lung cancer in mice.....609
————, **4–nitro–.** Induction of sarcoma in mice by a new carcinogen.....663
———— **1–oxide hydrochloride, 4–hydroxyamino–.** Carcinoma of the glandular stomach of mice induced by 151
———— ———— ————, ————. Carcinomas of the glandular stomach and other organs of rats by 627
———— ————, **4–hydroxyamino–.** Production of hydrogen peroxide by 83
———— ———, ———— ————. Induction of skin tumors in mice by painting with.....161
———— ———, ———— ————, and related compounds, reaction mechanism of, in inactivation of the transforming activity of deoxyribonucleic acid 537
———— ———, **4–nitro–,** charge transfer in the molecular interaction of, and related carcinogens with DNA and deoxyribonucleosides ... .97
———— ———, ———, derivatives and their ability to induce unequal nuclear division in the synchronized division of *Tetrahymena*.....155
———— ———, ———, or 7,12–dimethylbenz[*a*]anthracene, effect of, placed on glandular stomach combined with oral administration of N, N′–(2,7–fluorenylene)bisacetamide or N–nitrosodiethylamine 211
————, ———, ———. Early events in *in vitro* carcinogenesis with.....261
———— ———, ———, with DNA and deoxyribonucleosides. Further observations on the charge transfer interaction of 295
———— ———, ———, interaction of, proteins and aromatic amino acids with 307

——— ———, ———, effect of the derivatives of, on submanifestational dose of 4–nitroquinoline 1–oxide.....523
——— ———, ———, interaction with deoxyribonucleosides. A nuclear magnetic resonance study of.....557
——— ———, ———, tritiated carcinogenic, metabolism of, and distribution of its metabolites in mouse 617
Radiotherapie in hyperbarem Sauerstoff. Stoffwechselveränderungen während 1
Rauscher leukemia. Continuous viral multiplication and neoplastic transformation in cell lines established from spleen of mice with.....583
Resistance, promotion of, to Ehrlich ascites carcinoma cells by injection of tumor cells mixed with yeast cell wall 655
RNA, incorporation failure of ^{3}H–pseudouridine into, by regenerating liver.....605
RNase and its inhibitor of host liver and spleen. Systemic effect of mouse leukemia on 279
Salivary gland extirpation, effect of, on the carcinogenesis of rat stomach by 4–nitroquinoline 1–oxide 223
Sarcoma, Nakahara-Fukuoka, sensitivity of, to antitumor agents, especially to purine analogs 115
———, induction of, in mice by a new carcinogen, 4–nitroquinoline 663
——— **cells,** Yokohama Thorotrast, developed during *in vivo* and *in vitro* passages. Comparative study on the biological characteristics of.....411
———**180** solid tumor. Growth-inhibitory activity of mannan fractions isolated from several species of yeast against.....65
——— solid tumor. Growth-inhibitory activity of purified mannan and glucan fractions from baker's yeast against 273
Sauerstoff, hyperbarem. Stoffwechselveränderungen während Radiotherapie...1
Schizophyllan, a glucan produced by *Schizophyllum commune*. Host-mediated antitumor action of 137
Scirpene metabolites, new, of *Fusarium nivale*. Radiomimetic biological properties of 599
Seroepidemiological study, small-scaled. High anti-EB virus titer in sera of patients with nasopharyngeal carcinoma 335
Skin paiplloma induction. Suspicious influence of thymectomy on.....57
—— **tumors,** induction of, in mice by painting with 4–hydroxyaminoquinoline 1–oxide 161
SL–leukemia cells and other murine leukemia cells. Antigenic relationship between.....355
Squamous carcinoma, cytology and enzyme histochemistry of, of the hamster cheek pouch and human oral mucosa 631
Stomach, rat, by 4–nitroquinoline 1–oxide. Effect of salivary gland extirpation on the carcinogenesis of.....223
Tetrahymena, synchronized division of. Parallelism between carcinogenic activity of 4–nitroquinoline 1–oxide derivatives and their ability to induce unequal nuclear division in.....155
Therapy, multiple combination, in cancer chemotherapy in Japan 239
Thymectomy, suspicious influence of, on skin papilloma induction.....57
Thymic lymphomas, development of, in $(C3Hf/Bi \times AKR)F_1$ hybrids bearing thymus, spleen, or lymph node grafts from preleukemic AKR/Ms mice...595
Thymidine kinases from normal and tumor tissues 41
Transformation, neoplastic, and continuous viral multiplication, in cell lines established from spleen of mice with Rauscher leukemia 583
———, malignant, of an established kidney cell line from African green monkey by the Schmidt-Ruppin strain of Rous sarcoma virus.....591
Transplantation of spontaneous hepatomas in C3H mice; biological and biochemical studies 145
——— of newly established human cancer cell line.....649

Tumor cells Effect of insect-moulting hormones, ecdysterone and inokosterone, on 341
——— ——, transpulmonary passage of. Quantitative study on 483
——— **extract,** liver. Induction of liver tumor in mice injected at birth with 119
——— **induction** by adenovirus type 12 and its target cells in central nervous system 383
Tumorigenesis, mammary, in a colony of AKR mice. Interference of leukemogenesis by 227
Urea, N-nitrosobutyl-, in drinking water. Development of leukemia in rats by oral administration of.....237
Urinary bladder tumor, histogenesis of, induced by N-butyl-N-(4-hydroxybutyl)nitrosamine in rats.....401
Viral multiplication, continuous, and neoplastic transformation in cell lines established from spleen of mice with Rauscher leukemia 583
Virus production, increase of, in long-term cultured clonal sublines.....107
Virus particles, herpes-type, and chromosome markers in two human cell lines derived from embryonic cultures exposed to human leukemic culture fluid *in vitro* 247
Virus sarcoma, Rous. Malignant transformation of an established kidney cell line from African green monkey by the Schmidt-Ruppin strain of.....591
Yeast, growth-inhibitory activity of mannan fractions isolated from, against sarcoma-180 solid tumor.....65
———, baker's, growth-inhibitory activity of purified mannan and glucan fractions from, against sarcoma-180 solid tumor 273
